

## Bikeride XtremMontseny

This is our most demanding proposal, a challenge for those who dare cover 140-km (86 mi) and 4,800 meter-positive drop in just two days, available all through the year thanks to our excellent weather. Many miles of paths and narrow roads are found, starting at the Mediterranean and following up to nearly the highest **Montseny**.

During the route you will cycle through a natural environment full of history, pervaded with ancient craftsmen jobs, witches and legends. These will be two very intense days, surrounded by silence, sensations and surprises, through high mountains and Mediterranean landscapes; in short, diversity, fun and extreme effort.

### Level of difficulty:

**BikerideXtremMontseny** is a high physical and technical difficulty level route. That is why, to be able to complete it easily and enjoy the landscape, you must be experienced and used to cycle on MTB.

**Stages:** 2 days

## STAGE 1: MATARÓ - VILADRAU

We set off at **Mataró**, a town by the sea and cycle many kilometres along the coast to immediately start cycling along the first paths on the route, all of them suitable for biking and tending to rise.

From **Llinars del Vallès** up to **Sant Esteve de Palautordera** we will find good paths, surrounded by nice landscapes. At **Sant Esteve de Palautordera** we will start our climb to one of the highest zones on the route (1,100m-high) along narrow ways and paths. Once on top, we can enjoy the typical high mountain landscape and extensive views: from the sea to the **Pyrenees!!!**

From this point we will start our descent to **Viladrau** to finish this first stage at the hotel, where we can get our strength back to face the hard stage on the following day.

## STAGE 2: VILADRAU - MATARÓ

This second stage will even be a little harder than the first. We set off at **Viladrau**, cycling through probably the most spectacular landscapes on the route. We will run on a great variety of ways and paths, always rising, sometimes sharply, to end up reaching some tops above 1,300m-high. In this area you will enjoy some spectacular views of the **Pyrenees** and the sea if the day is bright enough.

At this point we will start a long descent to face the second part of the stage, where we will cycle through the mountains by the coast, lower but full of beautiful paths we will enjoy on our bike.

The stage will end in **Mataró**, where you can go to the beach and have a bath in the sea in summer or winter for the most daring.
